**1- First open this file with notpad or notpad++**

Xampp > php > php.ini

2- Change those properties

Changing the MySQL settings worked. This is what I changed, exactly:

In php.ini

Find:

```
post_max_size = 8M
upload_max_filesize = 2M
max_execution_time = 30
max_input_time = 60
memory_limit = 8M
```

Change to:

```
post_max_size = 750M
upload_max_filesize = 750M
max_execution_time = 5000
max_input_time = 5000
memory_limit = 1000M
```

3- watch this video to change max_allowed_packet:

https://www.youtube.com/watch?v=zDaaG8hFYlk

4- then you can import our database 😊
